# anti-humidity

collection by decal

decal anti-humidity effectiveness  
from printing to application

We appreciate your interest in **the new decal anti-humidity range**, developed to **eliminate vinyl waving** and **curling**. **Prints, finishing** and **applications** now have decal effectiveness from the first to the last minute.

ANTI-WAVING

### **printings without**

- . recurrent cleaning and wear of the print heads
- . waste of consumables (vinyl and inks) and cleaning materials
- . vulnerability to heat during machine heating
- . working against the clock in image preparation, between jobs and storage

ANTI-WAVING

ANTI-CURLING

### **finishing without**

- . concerns in the solvent evaporation phase
- . misalignment of the registration marks
- . irregularities in the cut
- . lamination with stains, creases and bubbles

ANTI-CURLING

### **applications without**

- . difficulty when positioning the vinyl
- . creases and tears in the liner
- . changes in the relative humidity levels of each location

We send you **samples** of some products of our **vinyl anti-humidity collection**, which guarantee **more profitability, speed** and **quality** in **Sign Graphics** jobs throughout the process.
