

DINOV STICK

APPLICATION FOR HELP

APPLICATION ON GLASS SURFACES

POSEZ EN TOUTE SIMPLICITÉ

FEATURES

DINOV Stick is a solution for the application of film on glass, it delays the adhesion of the glue to the surface, even at high temperature.

Ecological solution designed for the installation of films of glazing. DINOV Stick delays drying, thus facilitating the positioning of the film. The DINOV Stick can be used even at high temperature. Without risk for the user, raw materials are made of plants and renewables. For a sincere respect for the environment, it does not contain dye.

MANUAL

(Read carefully the installation instructions of the film)

On perfectly clean glass, spray DINOV STICK liberally onto film adhesive. Then turnaround your film and pose it on the glazing as usual.
